Top Tips For Developing Fluency At Home

EYFS

When your child is reading to you, they will segment and blend unfamiliar words. Once they have blended, ask them to repeat the words again without sounding out. This will build their fluency.

Eg: m - a - n: man.... man.

Miss Bishop has uploaded a video onto tapestry to show you how this may look.

Phase 1

When reading aloud with your child, try echo reading. Read a sentence aloud, showing your child exactly how the sentence should sound. Then ask them to repeat it back to you.

[Watch this video to see what echo reading looks like.](#)

Phase 2

Just like phase 1, you can also use echo reading. Build the skill by gradually removing the pointing finger and focus on the impact of the punctuation and how characters are speaking.

For example, focus on words like 'exclaimed', 'whispered' or 'questioned'.

'Reading is the gateway for children that makes all other learning possible.'
